

Assignment 3

Overview of SQL.

SQL (Structured Query Language) is a standard programming language used for managing and manipulating relational databases.

1) Does ANSI recognize the data type DATE?

Yes, ANSI SQL recognizes the data type DATE. It is used to store date values in the format YYYY-MM-DD.

2) Which subdivision of SQL is used to insert values in tables?

Subdivision for Inserting Values:

The subdivision of SQL used to insert values into tables is the INSERT statement. This statement allows you to add one or more rows of data into a table.

```
INSERT INTO TableName (column1, column2, ...)
VALUES (value1, value2, ...);
```
